

Cloudpaging Studio 9.2.2 Release Notes

Date: June 8, 2020

Studio Version: 9.2.2.30120

Package Contents

Studio\Cloudpaging Studio.msi
 Studio\Cloudpaging Studio x64.msi

Documentation\Cloudpaging Studio Guide.pdf

Version Compatibility

The 9.2.2 Cloudpaging Studio fully supports all older appset versions. Older appsets may not have the full set of features available with the 9.2.2. Any edits made to these appsets will update their versioning.

Resolved Issues

Here's what we improved in this release.

Issue Type	Description	Ticket Number
Enhancement	9.2.2 Cloudpaging Studio now stores stronger checksums in the appset for CAEs.  This change is compatible with older versions of the Cloudpaging Studio and Cloudpaging Player.	CP-33542
Enhancement	Default encryption option in Studio is now 'AES-256 Enhanced'.  The encryption option 'AES-Enhanced' is only supported by Cloudpaging Servers with versions 8.9.0 or higher.	CP-33552
Bug	Updating pre-9.2.0 appsets on Cloudpaging Studio 9.2.0, using the same operating system as originally used to capture the application, notifies the user that it may produce an incorrect appset.	32252 CP-33577
Bug	Cannot capture applications on a secure boot machine with Cloudpaging Studio 9.2.0 due to missing digital certificate.	32230 CP-33560
