Appsets packaged with Cloudpaging Studio version 9.1.x and higher are supported on the 9.4.1 Cloudpaging Server.

Upgrade

Please read the accompanying upgrade guide for important information and full instructions if upgrading from a previous version of the Cloudpaging Server or Enterprise Portal.

Resolved Issues

Here are some improvements implemented, and bugs squashed in this release.

Cloudpaging Server & Enterprise Portal

Issue Type	Description	Ticket Number
Enhancement	<p>The 9.4.1 version addresses a few security enhancements:</p> <ul style="list-style-type: none"> • Display custom error pages on the Cloudpaging Server and Enterprise Portal. • The Cloudpaging Server web interface should not be accessible on servers where only the paging service is installed. • Updated the Cloudpaging Server and Enterprise Portal's 3rd party library to the latest security patch. 	<p>32285 CS-1428, CS-73, CS-1036, CS-858, CS-1370</p>

Issue Type	Description	Ticket Number
Enhancement	Activities related to user management on the Cloudpaging Server, and Enterprise Portal should be logged in the Core Service logs. For example, log activities such as account creation or deletion, privilege escalation, etc.	CS-1514
Enhancement	Improve the messages displayed on the Cloudpaging Server and Enterprise Portal when stopping or expiring Sessions. The UI now provides more information on how many sessions were successfully stopped or expired.	CS-318, CS-312

Cloudpaging Server

Issue Type	Description	Ticket Number
Enhancement	Update Subject and Subject Alternative Name in the self-signed certificate generated by the Cloudpaging Server to match the machine name entered during installation. The validity of the default self-signed certificate should be limited to 1 year only.	CS-1039
Bug	The 'Create a License Policy' button on the Upload Application page of the Cloudpaging Server should be disabled if the application upload process failed.	CS-1447
Bug	The Current session count field in the Edit Upgrade page of the Cloudpaging Server does not display the correct number of sessions.	CS-1532
Bug	The Cloudpaging Server cannot be started if the Keystore password contains '>', '<' or '&' special characters.	CS-888

Enterprise Portal

Issue Type	Description	Ticket Number
Enhancement	Improve the message displayed on the Enterprise Portal's Launch Applications page when a user attempts to launch an application with an expired license policy.	CS-1227
Enhancement	Improve the messages on the Enterprise Portal's Manage Principals page to provide more feedback to administrators.	CS-305
Enhancement	Improve the message in the Enterprise Portal's logs when duplicate nested groups are found for an Active Directory user.	32892 CS-1403

Issue Type	Description	Ticket Number
Bug	The Enterprise Portal cannot connect to Active Directory if a Contact object is present within the scope of the Base DN configured in the Enterprise Portal settings.	CS-1489 33098
Bug	Cannot submit changes to the Enterprise Portal's system configuration page after upgrading due to a browser cache issue on Chrome.	CS-952
